

Training Day10 report

20 June 2024

Revision of previous topic

- hover
- div
- class and id

CSS Overflow Properties with syntax:

- **visible:**The overflow is not clipped. It renders outside the element's box.This is default.
overflow:visible;
- **hidden:**The overflow is clipped, and the rest of the content will be invisible. Content can be scrolled programmatically (e.g. by setting scrollLeft or scrollTo())
overflow:hidden;
- **clip:**The overflow is clipped, and the rest of the content will be invisible.Forbids scrolling, including programmatic scrolling.
overflow:clip;
- **scroll:**The overflow is clipped, but a scroll-bar is added to see the rest ofthe content
overflow:scroll;
- **auto:**If overflow is clipped, a scroll-bar should be added to see the rest of the content
overflow:auto;
- **initial:**Sets this property to its default value. Read about initial
- **inherit:**Inherits this property from its parent element. Read about inherit
